Antiscalant	X	X	X					

Combat harmful contaminants and get better-tasting water

Elkay filters are tested and certified to NSF/ANSI 42, 53 and 401 to reduce lead, microplastics and other harmful contaminants.

And FLP4 allows you to say goodbye to sneaky “forever chemicals” in your water… PFAS hang around in everyday stuff and they don’t readily break down. They love to hang out in your water supply. Exposure to PFAS may cause liver and thyroid issues, reproductive harm, and reduced vaccine response.

Millions of water lines in the U.S. still contain lead, a substance scientifically proven to cause serious health issues. Elkay’s certified lead reduction technology helps protect everyone in the building by keeping lead out and cleaner, safer water in. Certified protection where it matters most.

*Total PFAS as defined by NSF/ANSI 53
